SWING BED PROGRAM

Short Term Rehabilitation

THE BENEFITS

- Hospitalists on site 24/7
- 24 Hour Nursing
- Physical, Occupational and Speech Therapy
- Social Services
- In House Pharmacy
- Meals and Activities

After an illness or injury that requires hospitalization, it is sometimes necessary to have skilled nursing care.

Our Swing Bed Program allows you to recover faster, closer to home under the care of expert physicians, nurses and rehabilitation team in a hospital setting.

SERVICES COVERED BY MEDICARE AND SOME INSURANCE COMPANIES

When I arrived at Perry County Hospital, I was a wreck, and I was afraid. They ran general tests on me to determine what was wrong. When the nurses realized I was afraid, they began talking to me and helped me with my fear. They helped me a lot even before we knew what was wrong. When the doctor finished the tests, they determined I was dehydrated. I have been here 8 days now. I praise the people who have taken care of me. The nurses, Doctors, housekeepers, kitchen staff. I felt so comfortable around them. They all performed their jobs so well! I have no complaints.

I would recommend PCMH Swing Bed to all my friends and family.

-- Kenneth Holley
Former Swing Bed Patient

WHEN YOU NEED MORE TIME TO HEAL

- Transition between hospital and home with the goal of getting you stronger and home sooner.
- Promotes independence and assists in recovering and mobility after a post-acute illness, injury or surgery.
- Educates on safe use of equipment and pain management.
